Hi Randy,  
Of course Priscilla can attend. Feel free to invite anyone who might be interested. What is her email address?

Jayne

Hello Jayne,

Too bad the weather didn't cooperate. I guess it was their turn. Would it be OK with you to have Priscilla Woolverton on the call next week? She was hired to work on the voluntary septic program and is more familiar with the approach than I am. She wasn't able to attend today (as she has to trainings today for realtors), but she looks available for the new date.

Randy

**Subject:** Meeting Postponed Until Feb 19 on OR CZARA OSDS (New Call In Number)

Hi All,

See agenda below.

***This meeting has been postponed until Feb 19 as the governmental agencies in the DC Metro area are closed due to snow today.***

**Oregon's Onsite Disposal Systems Management Measure Submittal**

**February 19 at 9 AM PST or Noon EST**

**[ Nonresponsive ] (in Dave C's Office for Seattle folks)**

**Goal:** To answer Oregon's questions regarding EPA/NOAA's proposed response to Oregon's revised OSDS submittal

**Projected outcome:** Understanding of EPA/NOAA's remaining concerns and possibly determining a path forward

**Agenda**

Goal/Outcome/Introductions (Jayne/All)

Opening/Desired Outcomes for this Call from Oregon's Perspective (ODEQ)

Summary of Remaining Concerns (Don, see below)

Questions/Clarification on Remaining Concerns (All)

Next Steps

**OSDS**

To address this MM, Oregon still needs to:

- establish a target of percent of time-of-transfer OSDS inspections across the coastal nonpoint management area that is equally as effective as Oregon's previously proposed regulatory approach and a timeframe with realistic interim milestones for achieving this target over a 15-year implementation period.
- remove the ambiguity in its commitment to track progress toward this goal.
- commit to using its back-up enforcement authorities to meet the target if future tracking shows that the voluntary approach is not effective for reaching the target over time.
- To strengthen this MM, Oregon can show how the TMDL approach would lead to increased OSDS inspections.
